New Feature...

Research supported by BES Grants - Previous Recipients

The BES encourages members to apply for grant funding where they are a Lead Researcher to financially assist with equipment and materials for an endodontic related research project. A new feature is being developed on the website to highlight previous grant winners. This month we feature **Professor Chris Lynch** who led research 'To determine dental pulp responses to heat and light-curing of dental restorative materials' which was published in November 2018.
